

INSTALLAZIONE

INSTALLATION

<p>Non torcere il tubo <i>Do not twist the hose</i></p>			<p>Installare libero da torsioni <i>Install it torsion-free</i></p>
<p>Dimensionare adeguatamente il tubo <i>Determine the correct dimension</i></p>			<p>Fare attenzione che la parte flessibile non sia troppo corta <i>Take care that the flexible lenght is not too short</i></p>
<p>Evitare un'eccessiva piegatura del tubo <i>Avoid excessive bending of the hose</i></p>			<p>Usare delle curve rigide <i>Use pipe bends</i></p>
<p>Non torcere il tubo da un'installazione piana <i>Do not move the hose obliquely to the installation plane</i></p>			<p>Il movimento deve essere solo lungo l'asse del tubo <i>Movement should be along the axis of the hose only</i></p>
<p>Non lasciar cadere il tubo <i>Do not allow the hose to sag</i></p>			<p>Usare un supporto <i>Use a support</i></p>
<p>Evitare di torcere il tubo quando i raccordi non sono sullo stesso asse <i>Avoid torsional twist when fittings are not in line</i></p>			<p>Installare solo su un piano <i>Install in one plane only</i></p>
<p>Non consentire movimenti assiali <i>Don't permit axial movements</i></p>			<p>Installare il tubo solo verticalmente alla direzione del movimento <i>Install the hose vertical to the direction of movement</i></p>
<p>Non utilizzare una lunghezza eccessiva <i>Do not use excess length</i></p>			<p>Dimensionare l'esatta lunghezza <i>Dimension the exact lenght</i></p>
<p>Evitare torsioni dovute a movimenti angolari <i>Avoid torsion due to angular movements</i></p>			<p>Tutti i movimenti devono essere solamente lungo l'asse del tubo <i>All movements should be only along the axis of the hose</i></p>
